Product Overview

Reliable Wireless Connectivity

This 4G LTE Customer Premises Equipment (CPE) provides robust wireless broadband internet access by utilizing cellular networks. It is designed for versatility, supporting 4G, 3G, and 2G technologies to ensure consistent connectivity. With plug-and-play functionality for SIM cards and wired LAN support, it offers a straightforward solution for diverse networking environments.

Connectivity

Supported Connections

- 4G Internet to LAN
- Wireless Broadband
- SIM Card Plug-and-Play

Network Compatibility

4G LTE, 3G, 2G

Hardware Features

Physical Ports

- SIM Card Slot
- LAN Port
- WAN/LAN Ethernet Port
- Power Connector

Antenna Configuration

2 pcs

External Antennas

Management & Status

- Factory Reset Button
- LED Status Indicators
