Product Overview

High-Performance DDR3 Memory Upgrade

This 4GB DDR3 memory module is designed to provide efficient multitasking and responsive system performance. Operating at a frequency of 1600MHz, it ensures rapid data transfer for compatible desktop and laptop systems. Its reliable architecture supports dual-channel configurations, making it an excellent choice for users looking to optimize their computing experience.

Technical Specifications

Memory Capacity

4 GB

Total Capacity

Supported Form Factors

- DIMM (Desktop)
- SODIMM (Laptop/Small Form Factor)

Frequency	1600 MHz
Memory Type	DDR3 / DDR3L
Rank Configuration	2Rx8
Certifications	CE, ISO 9001

Performance Data

Performance Parameters

Parameter	Value
Standard	PC3L-12800S
CAS Latency	11-13-F3
Technology	DDR3 SDRAM
