Product Overview

High-Performance Memory Upgrade

This 4GB DDR3L SODIMM memory module is engineered to enhance system responsiveness and improve multitasking capabilities in laptops and small form factor computers. Operating at a low voltage of 1.35V, it provides an energy-efficient solution for upgrading existing systems or building new compact hardware. The module supports a clock speed of 1600MHz to ensure reliable data processing performance.

Technical Specifications

Capacity	4 GB
Clock Speed	1600 MHz
Voltage	1.35 V
Memory Type	DDR3L
Form Factor	SODIMM
Rank	1Rx8

Identification

Model Number	KT4GS3ED8
Serial Number	219C1241877

Compliance & Compatibility

Suitable For	Laptops, Small Form Factor PCs
