

4K UHD LED Smart TV with Narrow Frame

This LED TV features a narrow brush treatment frame and a UHD 4K panel. It operates on an Android system.

Overview

D15 Series Smart LED TV

The D15 Series offers a versatile range of high-definition viewing experiences, from standard HD up to stunning UHD 4K resolution. Designed with a sleek narrow brush-treatment frame, these units feature an Android-based smart system and support for global broadcasting standards like Ginga, ISDB-T, and DVB. With wide 178-degree viewing angles and essential connectivity options including HDMI and USB 3.0, this series is built to meet diverse commercial and residential display requirements.
