

4mm Component Tape Feeder for SMT Placement Machines

This component tape feeder is designed for automated component placement. It accurately dispenses 4mm wide component tapes for reliable pick-and-place operations.

Product Overview

High-Precision Component Tape Feeder

This 4mm component tape feeder is engineered for automated component placement in electronic assembly environments. Designed to facilitate reliable and efficient pick-and-place operations, it ensures accurate dispensing of 4mm wide component tapes. It is an essential tool for high-volume production lines requiring consistent performance and precision.

Technical Specifications

Tape Width	4 mm
Machine Compatibility	SMT Placement Machines

Operational Features

Production Environment High-Volume • Electronic Assembly	
Primary Application	Automated Component Placement
