

4PN Series Submersible Borehole Water Pump

The 4PN series borehole pumps are designed for submersible deep well applications. Constructed with stainless steel, these pumps are suitable for various water extraction needs.

Product Overview

4PN Series Submersible Borehole Pump

The 4PN series is engineered for high-performance water extraction from deep wells and reservoirs. These submersible pumps are built for durability and efficient operation, making them suitable for a wide range of domestic, civil, and industrial water supply systems. With a robust design capable of handling challenging environments, they provide reliable water delivery for agricultural and irrigation needs.

Operating Conditions

| | |
|-------------------------|----------|
| Max Fluid Temperature | 35 |
| Maximum Sand Content | 0.15 % |
| Maximum Immersion Depth | 50 m |
| Minimum Well Diameter | 4 inches |

Technical Specifications

Power Supply Options

- Single-phase: 220V - 240V/50HZ
- Three-phase: 380V - 415V/50HZ

| | |
|--------------------------|------------------|
| Motor Type | Rewindable motor |
| Curve Tolerance Standard | ISO 9906 |

Certifications & Compliance

| | |
|----------------|-----------------------------|
| Certifications | CE, ISO 9001, RoHS, GS, CCC |
|----------------|-----------------------------|

Warranty & Support

| | |
|----------|---------|
| Warranty | 2 years |
|----------|---------|
