

4SR Series Submersible Deep Well Pump

This submersible pump is designed for efficient water extraction from deep wells and boreholes. Its durable construction ensures longevity and resistance to corrosion in demanding environments.

Overview

Professional Submersible Deep Well Pump

The 4SR Series submersible pump is engineered for reliable and efficient water extraction from deep boreholes and wells. Featuring a versatile compact design, it is suitable for various diameters ranging from 2 to 6 inches, ensuring adaptability for narrow installations. With built-in protection mechanisms against overload and dry running, this pump provides the durability and consistent performance required for irrigation and professional water supply applications.

Technical Specifications

Compatible Well Diameters

- 2 inch
- 2.5 inch
- 3 inch
- 3.5 inch
- 4 inch
- 6 inch

Built-in Protection	Overload Protection, Dry Running Protection
Application Areas	Irrigation, Water Supply, Pressure Boosting
