Product Overview

Submersible Solar Water Pump

The 4TSS is a highly efficient submersible solar water pump designed for deep well applications and irrigation. Utilizing advanced permanent magnet motor technology without carbon brushes, it provides a reliable, eco-friendly solution that supports automatic AC/DC source switching. It is built for durability in demanding environments like agriculture, construction, and water conservancy systems.

Technical Specifications

Motor Technology	Permanent magnet, brushless
Maximum Submersion Depth	80 m
Operating pH Range	6.5 - 8.5
Max Ambient Temperature	40

Key Features

Product Highlights	Solar Powered, Automatic AC/DC Switching, Energy Saving, High Efficiency
--------------------	--

Application Fields

Suitable Uses

- Building and construction water supply
- Domestic water supply
- Agricultural irrigation
- Small water works
- Landscaping
- Water conservancy systems
- Industrial factory water use
