

4x2 Inch Abrasive Grinding Cup Wheel

This grinding machine supporting cup wheel has dimensions of 4x2x5/8-11. It is constructed with aluminum oxide and silicon carbide.

Product Overview

Professional Abrasive Grinding Cup Wheel

This abrasive cup wheel is engineered for efficient material removal and surface grinding applications in industrial environments. Featuring a robust cup-shaped design, it is optimized for durability and consistent performance. The wheel is built to handle demanding tasks, making it a reliable choice for professional grinding operations.

Technical Specifications

Diameter	4 inch
Thickness	2 inch
Arbor Hole	5/8-11 Threaded
Model Identifier	8877-228

Application

Primary Application	Material Removal, Surface Grinding, Industrial Use
