Overview

Efficient Urban Waste Management

This 4x2 garbage compactor truck is engineered for high-efficiency waste collection and transportation in urban and commercial environments. Featuring a robust chassis and a powerful engine, it includes a sophisticated hydraulic compaction system that maximizes payload capacity by compressing waste material. Designed for durability and maneuverability, this vehicle offers a reliable solution for municipal waste management operations.

Technical Specifications

Drivetrain Configuration	4x2
Compaction System	Hydraulically operated compaction blade
Body Construction	High-strength steel
Loading Mechanism	Rear loading hopper

Key Features

Ideal Applications

Municipal Waste Collection • Commercial Waste Disposal • Urban Environments

Operational Benefits

- Optimized for tight urban spaces
- Corrosion-resistant body
- Automated compaction cycles
- User-friendly control panel
- Sealed waste container to prevent odor and leakage

Safety Features

Anti-lock Braking System (ABS), Emergency Stop System, Reinforced Cabin Structure, Reflective Markings
