

5-1000MHz 2-Way RF Splitter

This 2-way splitter is designed for high-performance signal distribution. It supports a frequency range of 5-1000MHz and features ports rated for 6KVAC 10A Max.

Product Overview

High-Performance Signal Distribution

This 2-way RF splitter is engineered for reliable signal distribution across a versatile frequency range of 5-1000MHz. Designed for industrial and commercial environments, it ensures consistent performance and safety with robust electrical ratings. Its compact design facilitates easy integration into existing signal infrastructure.

Technical Specifications

Frequency Range

5 MHz

Min Frequency

1000 MHz

Max Frequency

Electrical Ratings

Specification	Rating
Max Voltage	6KVAC
Max Current	10A

Port Configuration	1 Input, 2 Output
Ideal Use Case	Industrial, Commercial, Signal Distribution
