

5-10kW Three-Phase Solar Inverter

This solar inverter offers over 98% maximum efficiency and multiple protection levels. Its 2 MPPT design uses a precise algorithm and integrated Export Power Manager.

Product Overview

Versatile Three-Phase Solar Solutions

This three-phase string inverter series is engineered as a reliable solution for residential, small industrial, and commercial photovoltaic power stations. Designed for maximum flexibility, it utilizes dual MPPT trackers to optimize energy harvesting across varying installation conditions. The compact form factor combines high efficiency with advanced grid-tied conversion, making it a preferred choice for modern energy management systems.

Performance

Rated Power Range

5 kW

Minimum Power

10 kW

Maximum Power

Technical Specifications

Number of MPPTs	2
System Phase	Three-phase
Voltage Class	Low Voltage

Application Suitability

Recommended Usage	Residential, Small Industrial, Commercial
-------------------	---

Key Features

Product Highlights

- Integrated 4G communication
- Advanced grid support functions
- Comprehensive protection features
- Compact and efficient design
- Flexible dual MPPT configuration
