

5-20 mm Inside Micrometer

This inside micrometer measures the internal dimensions of mechanical parts. It offers good quality and is suitable for precise measurements in industrial applications.

Product Overview

Precision Inside Micrometer

This inside micrometer is designed for high-precision measurement of internal dimensions across a wide range of industrial applications. Featuring a consistent graduation of 0.01 mm, it ensures accuracy and reliability for quality control and manufacturing tasks. The series covers various measurement ranges from 5 mm up to 200 mm, providing versatility for different project requirements.

Technical Specifications

| | |
|------------------------------|----------------------------------|
| Graduation | 0.01 mm |
| Imperial System Availability | Available with 0.001" graduation |

Model Selection

Available Models and Ranges

| Article Number | Measuring Range | Graduation |
|----------------|-----------------|------------|
| IM01-1011 | 5-30 mm | 0.01 mm |
| IM01-1021 | 25-50 mm | 0.01 mm |
| IM01-1031 | 50-75 mm | 0.01 mm |
| IM01-1041 | 75-100 mm | 0.01 mm |
| IM01-1051 | 100-125 mm | 0.01 mm |
| IM01-1061 | 125-150 mm | 0.01 mm |
| IM01-1071 | 150-175 mm | 0.01 mm |
| IM01-1081 | 175-200 mm | 0.01 mm |
