Overview

Precision Stone Fabrication

This 5-axis CNC multi-function stone cutting machine is engineered for the precise cutting and shaping of diverse stone materials. Featuring a robust frame and advanced CNC controls, it delivers high-speed, accurate material removal for complex profiles and intricate designs. It is an ideal solution for stone fabrication businesses looking to produce countertops, monuments, and decorative stone products with consistent repeatability.

Technical Specifications

Axis Capability

5-Axis

Key Features

- Robust frame construction
- Advanced CNC control system
- High-speed cutting spindle
- Integrated coolant system
- Large worktable

Machine Type

5-Axis CNC Multi-Function Stone Cutting Machine

Applications

Suitable Applications

Countertops, Vanities, Monuments, Decorative Stone Products, Profiling, Shaping
