Overview

Professional Water Transport Solution

This 5 cubic meter water tank truck is engineered for versatile utility in municipal and construction environments. Featuring a robust, corrosion-resistant tank and a high-pressure pumping system, it delivers reliable performance for dust suppression, street cleaning, and irrigation. Its compact design ensures excellent maneuverability in confined urban spaces, while the adjustable spray system and water cannon provide precise, efficient water delivery.

Technical Specifications

Tank Capacity	5 CBM
Primary Applications	Dust Suppression, Street Cleaning, Irrigation, Construction Support
Tank Material Properties	Corrosion-resistant material for water purity

Equipment & Features

Spraying Capabilities

- Adjustable spray nozzles
- Directional water cannon
- High-pressure water pump

Safety Equipment

- Reflective safety markings
- Rear bumper
