

5-Channel 800W Car Audio Amplifier

This 5-channel power amplifier is designed for car audio systems. It delivers 800W of power and features MOSFET technology for efficient performance.

Overview

High-Performance 5-Channel Audio Solution

This 5-channel power amplifier is engineered to elevate car audio systems by delivering a robust 800W of total power. Utilizing advanced MOSFET technology, it ensures efficient and reliable performance even under demanding conditions. Designed for versatility, this unit is capable of powering a full array of vehicle speakers and subwoofers, creating a dynamic and immersive listening environment for any vehicle.

Technical Specifications

Total Power Output

800 W
Max Power

Technology

MOSFET

Channels

5

Model Number

TL-X503
