

5-Gallon Bottle Blow Mold

Precision-engineered for manufacturing 5-gallon water bottles. Constructed from high-grade steel, it ensures consistent bottle dimensions and structural integrity.

Product Overview

Precision-Engineered 5-Gallon Blow Mould

This high-grade steel blow mould is specifically designed for the efficient manufacturing of 5-gallon water bottles. It features optimized cooling channels to facilitate rapid heat dissipation, significantly reducing cycle times and boosting production output. Engineered for high-volume environments, this mould ensures consistent structural integrity, smooth surface finishes, and precise threading for reliable cap compatibility.

Technical Specifications

Application	5-Gallon Water Bottle Production
Material	High-grade steel
Key Features	Optimized cooling channels, High-volume production ready, Precision threading, High-grade steel construction
