

# 5-Gallon Liquid Filling Machine

This automatic filling machine is designed for filling 5-gallon bottles. Constructed with stainless steel, this equipment ensures hygiene and durability for industrial use.

## ADDITIONAL IMAGES

## Product Overview

### Automated 5-Gallon Barrel Production

This full automatic production line is specifically engineered for the high-volume filling of 5-gallon drinking water barrels. The system integrates three critical processes—washing, filling, and sealing—into a single, streamlined operation. Designed for efficiency and hygiene, it utilizes multi-channel spray systems for thorough disinfection and automated controls to manage the entire production cycle from input to output.

## Technical Features

### Operational Capabilities

- Automatic bottle washing
- Multi-channel liquid and disinfectant spraying
- Automated filling
- Automatic capping/sealing
- Automated counting
- Output management

### Automation Level

Full Automatic

### Construction

Stainless Steel, Industrial Grade

### Disinfection

Multi-channel washing liquid spray and disinfectant spray with recycling capabilities
