

# 5-Gallon Water Filling Machine

This monoblock machine washes, fills, and caps 3- to 5-gallon barrels. It is designed for stable and fast operation.

## Product Overview

### Professional 5-Gallon Bottling Solution

This high-performance automatic filling line is designed specifically for 5-gallon water containers, providing a reliable solution for mineral, distilled, and purified water production. Constructed from food-grade stainless steel, the machine ensures exceptional corrosion resistance and hygiene. By integrating advanced machine, electronic, and pneumatic components, it offers an efficient and compact system for modern water bottling facilities.

## Technical Specifications

### Production Capacity

**240 barrels/hr**

Capacity

### Water Consumption

- Filling: 3T/H
- Washing: 1T/H

### Power Supply

380V, 50Hz, Max 4KW

### Air Pressure/Consumption

0.5~0.6Mpa, 350L/M

### Overall Dimensions

2800 \* 1100 \* 1700 mm

## Features & Technology

### Key Components

- OMRON micro-computer control system
- Food-grade stainless steel construction
- Automatic cap settling and transport system
- Advanced American-technology shower nozzles

### Safety Systems

Automatic trouble protection • Emergency stop functionality • Enclosed filling zones

### Certifications & Standards

CE, ISO 9001, CQC
