Product Overview

Professional Grade Switch Panel

This 5-gang rocker switch panel is a comprehensive power control and monitoring solution designed for marine, automotive, and RV environments. It integrates five durable SPST ON-OFF toggle switches with individual circuit breakers, a digital DC voltmeter, a 12V power socket, and dual USB charging ports. Built with flame-retardant materials and featuring rubber sealing covers, this panel provides reliable overload protection and is resistant to water, dust, and debris in harsh conditions.

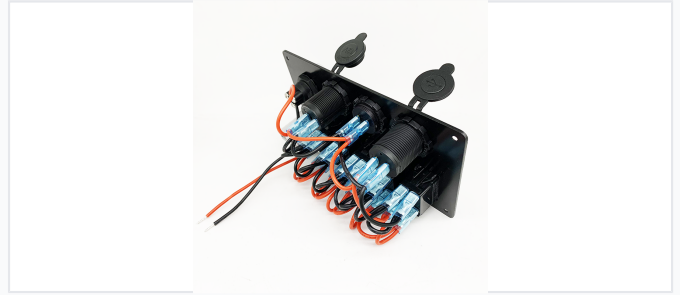

Technical Specifications

Voltage Rating	12VDC / 24VDC
Switch Rating	20A 12V / 10A 24V
Operating Temperature	-25°C to +85°C
Switch Function	SPST ON-OFF Rocker
Terminal Pins	5

Build Quality

High-end luxury switch panel with blue LED indicators.

Rubber sealing covers protect USB and 12V ports from water and dust.

Indicators & Lighting

Blue LED Light • Integrated Voltmeter • Rubber Sealing Covers

Materials

Aluminium, ABS, Metal, Flame Retardant

Compatibility & Use

Ideal For

- Marine & Boats
- Automotive
- RV & Campers
- Motorcycles
- Trailers
