Overview

Professional Metal Cutting and Grinding Discs

These resin-bonded, fiberglass-reinforced aluminum oxide discs are engineered for high-performance cutting and grinding on both ferrous and non-ferrous metals. Designed with safety and precision in mind, they offer clean, burr-free cutting with minimal vibration. The wheels are optimized for durability and sharpness, ensuring efficient stock removal and reduced thermal damage to workpieces.

Technical Specifications

Performance Metrics

80 m/s

Max Operating Speed

12250 RPM

Maximum RPM

Abrasive Composition

- Premium Aluminum Oxide abrasive
- Resin-bonded matrix
- Reinforced fiberglass net
- Metal ring reinforcement
- Iron, sulphur, and chlorine content < 0.1%

Available Grit Sizes

24#, 30#, 46#, 60#

Compliance and Quality

Certifications & Standards

MPA EN12413 • ISO 9001 • ISO 14001 • OHSAS 18001
