

# 5-Inch Submersible Water Pump

The 5SL series submersible pumps are engineered for effective water delivery across various applications. These 5-inch pumps come in several models, each featuring different power ratings and performance capabilities.

## Overview

### 5-Inch Submersible Pump Series

The 5SL9 series 5-inch submersible pumps are engineered for high-efficiency water delivery across a wide range of demanding applications. Designed to operate at 2850rpm, these units offer versatile power compatibility, supporting both 220V/240V and 380V/415V electrical systems. With a comprehensive model lineup ranging from 2.2kW to 11kW, these pumps are built to provide reliable hydraulic performance and optimal flow rates for professional installation requirements.

## Technical Specifications

Pump Size	5 inch
Operating Speed	2850 rpm
Power Supply Compatibility	220V/240V (1-phase), 380V/415V (3-phase)

## Performance Data

### Model Performance Metrics

Model	Power (kW)	Power (HP)
5SL9/05	2.2	3
5SL9/07	3	4
5SL9/10	4	5.5
5SL9/13	5.5	7.5
5SL9/17	7.5	10
5SL9/20	9.2	12.5
5SL9/24	11	15

### Power Range

**2.2 kW**

Min Power

**11 kW**
