

# 5-Inch Vehicle GPS Navigation System

This 5-inch GPS navigation system offers reliable navigation with a clear display. It features turn-by-turn directions, distance and time to destination, and estimated arrival time.

## Product Overview

### Compact Vehicle Navigation Solution

This 5-inch vehicle GPS navigation system provides a reliable and user-friendly interface for in-car guidance. Powered by an ARM11 processor and running on Windows CE.NET 5.0, it offers essential features including route simulation and clear turn-by-turn directions. Designed with versatility in mind, the device supports multimedia playback and FM transmission, making it a comprehensive tool for drivers.

## Display & Hardware

### Display Specifications

**5 inch**

Screen Size

**480 px**

Resolution Width

**272 px**

Resolution Height

### Physical Dimensions

120mm (L) x 80mm (W) x 12mm (T)

## Technical Specifications

### Operating System

Microsoft Windows CE.NET 5.0

### Supported NAND Flash Capacity

- 128MB
- 256MB
- 512MB
- 1GB
- 2GB
- 4GB

### Processor

ARM11 CPU, 468MHz (MT3351, ARM1176JZ-S Core)

## Features

### Connectivity & Power

Feature	Details
FM Transmit	Supported
Battery Type	Built-in Li-ion
Charging Input	DC 6V

### Multimedia Capabilities

File Browser, Picture Browser, Audio Player, Video Player, MP3, MP4
