

5-Liter Mini-Keg Beer Cooler with Integrated Tap

This beer cooler is designed to maintain optimal serving temperature for 5-liter mini-kegs. It features an integrated tap system for convenient dispensing and a removable drip tray for easy cleaning.

Product Overview

Professional Mini-Keg Cooling Solution

The TH-12B beer cooler is engineered to maintain optimal serving temperatures for 5-liter mini-kegs, ensuring a perfect pour every time. Utilizing advanced thermoelectric cooling technology, this unit offers efficient and quiet operation suitable for home bars, restaurants, and commercial environments. Its integrated tap system and user-friendly interface provide a seamless dispensing experience, while the removable drip tray simplifies maintenance.

Technical Specifications

Capacity	5 Liters
