Overview

Rugged Performance for Challenging Environments

This 5-ton rough terrain forklift is engineered specifically for demanding outdoor applications, offering a robust solution for construction sites, lumber yards, and agricultural operations. Built with a specialized 2WD drivetrain, it features a 100% automatic differential lock that provides superior traction on uneven and inclement surfaces. The design prioritizes operator efficiency through an ergonomic, full-floating cabin and intuitive controls, ensuring stability and reliability in harsh work environments.

Performance

Load Capacity

5 t
Capacity

Min. Ground Clearance	330 mm
Steering Angle Range	43.6° to 70°
Drivetrain & Traction	2WD, 100% Automatic Differential Lock, Power Shift Transmission, Torque Converter

Engine & Powertrain

Engine Options

- Yanmar
- Mitsubishi
- Kubota

Operator Comfort

Cabin & Ergonomics

- Full floating operator cabin
- Adjustable tilt steering wheel
- Full suspension seat with seat belt
- Forward-positioned travel & hydraulic controls

Safety Systems

Floating R.O.P System • Brake Control • Two-pedal inching
