

50 Amp Industrial Waterproof Electrical Socket

This industrial waterproof electrical socket is designed for 3-phase power applications and rated at 50 Amps. Its robust construction ensures protection against water ingress, dust, and other contaminants, making it suitable for outdoor or damp locations.

Overview

Industrial-Grade Power Connectivity

This industrial waterproof electrical socket is engineered for high-demand 3-phase power applications. Designed with robust construction, it provides reliable and safe electrical connections in harsh environments, effectively protecting against water ingress, dust, and contaminants. It is an ideal solution for construction sites, factories, and outdoor or damp locations where durable, weatherproof power transmission is critical.
