Overview

Versatile Agricultural Performance

This 50 HP wheel tractor is engineered for high performance in both dry and paddy field applications. Featuring a robust engine with a torque reserve coefficient of at least 25% and a traction force of 13.2 KN, it is built for demanding farming tasks. The machine incorporates advanced European technology, including a synchronizer 12F+12R gearbox and a strengthened chassis, ensuring reliability and ease of operation for professional agricultural needs.

Performance Metrics

Engine Power

50 HP

Horsepower

13.2 KN

Traction Force

Technical Specifications

Transmission	Synchronizer 12F+12R gear
Emissions Compliance	Euro II, Euro IIIA

Hydraulics & Hitch

Max Lifting Force	9.1 KN
Three-Point Hitch	Category II
Hydraulic Output	Dual-way

PTO & Implements

PTO Rotation Speed

- 540
- 1000

PTO Splines

- 6
- 8

Options & Features

Optional Equipment

Internal air filter • External air filter • Upper exhaust • Lower exhaust • Single pipeline air brake • Double pipeline air brake
