

50 Ohm Coaxial Cable

This coaxial cable is designed for use in TV, broadcast emission, microwave, satellite communication, and internet (Ethernet) systems. It offers high transmission frequency and low attenuation.

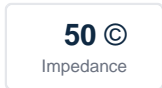

Product Overview

Professional 50 Ohm Coaxial Cable

This 50 Ohm coaxial cable is engineered for reliable signal transmission in demanding electronic and communication environments. Featuring high-quality copper conductors and durable polyethylene insulation, the cable provides consistent performance with minimal signal loss. It is protected by a flexible PVC sheath and a robust braid screen, making it suitable for diverse audio-video and electronic system installations.

Technical Specifications

Characteristic Impedance

Max Conductor Temperature

70

Construction

Insulation Material	Solid polyethylene
Outer Sheath	PVC
Shielding Materials	Soft plain copper wires, Tinned soft copper wires, Braid screened

Logistics

Available Roll Lengths

- 100m/roll
- 200m/roll
- 300m/roll
