

50-Ton Topkit Tower Crane

This topkit tower crane is designed for heavy lifting operations on construction sites. With a 50-ton lifting capacity, it ensures efficient and safe material handling.

Overview

High-Performance Topkit Tower Crane

The ST80/75-50t is a powerful topkit tower crane engineered for demanding heavy-lifting operations. Featuring a robust modular structure, this crane offers a maximum lifting capacity of 50 tons, making it an ideal solution for large-scale infrastructure and high-rise construction projects. Its advanced control systems ensure precise material handling, providing a reliable and cost-effective solution for professional site managers.

Max Lifting Capacity

50 ton

Max Lift

Technical Specifications

Crane Type	Topkit Tower Crane
Model Identifier	ST80/75-50t

Design Features

Key Benefits

- Robust structural durability
- Modular design for simplified assembly and disassembly
- Advanced control system for precision
- High adaptability for high-rise and bridge construction

Applications

Suitable Projects	High-rise construction, Bridge building, Infrastructure development, Heavy material handling
