

50-Ton Truck Crane with Telescopic Boom

This truck crane has a five-section U-type boom with a length of 11.4m-43.5m, providing strong lifting performance. Its high-power engine delivers good dynamic performance and strong gradeability, with a maximum gradeability of 42% and a maximum travel speed of 85km/h.

Overview

Versatile 50-Ton Mobile Lifting Solution

This 50-ton telescopic boom truck crane is engineered for high-performance construction and heavy material handling applications. Featuring a robust 5-section 'U' type main boom, it offers exceptional reach and structural rigidity for demanding lifting tasks. Equipped with an advanced overload protection system and a high-power engine, this machine balances mobility, precision, and safety for professional infrastructure projects.

Technical Specifications

Rated Total Lifting Capacity

50 T

Max Lifting Capacity

Boom Performance

Metric	Value	Unit
Main Boom Sections	5	sections
Main Boom Length	42.7	m
Extended Boom + Jib	57.7	m

Operational Features

Equipment Highlights	U-type boom profile, Hirschmann PAT system, Heated cabin, Air conditioning, Full dimension cab
Engine Power Output	276 kw
