

50-Ton Truck Crane with Telescopic Boom

This 50-ton truck crane is designed for heavy lifting operations in construction and industrial environments. It features a telescopic boom that offers extended reach and precise control.

Overview

High-Performance 50-Ton Truck Crane

This 50-ton truck crane is engineered for heavy lifting with a versatile telescopic boom system and a robust double-axle drive chassis. It incorporates an advanced electrical proportion hydraulic system for superior load feedback and micro-mobility control. Built for safety, the crane features an intelligent SYMC control system with CAN-bus digital networking for real-time monitoring and comprehensive protection.
