

5000kg Flat Webbing Sling

This flat webbing sling is designed for lifting heavy loads. It is constructed from durable synthetic fibers and features reinforced loops for secure attachment, with a 5000kg working load limit (WLL).

Product Overview

High-Strength Flat Webbing Sling

This 5000kg flat webbing sling is engineered for heavy-duty lifting in industrial, construction, and rigging environments. Constructed from durable synthetic fibers, it features reinforced loops for secure attachment and offers a high strength-to-weight ratio. Its design ensures gentle handling of loads, making it particularly suitable for round or delicate objects while maintaining safety and reliability.

Technical Specifications

Working Load Limit

5000 kg

Working Load Limit (WLL)

Key Advantages

- Smooth surface prevents damage to tender loads
- Suitable for dragging or pulling applications
- Even load distribution for extended service life
- High strength-to-weight ratio
- Lightweight and flexible for narrow spaces
- Non-electric conductive material
- Color-coded by capacity per international standards

Safety & Compliance

Safety Options

Anti-abrasion protection, Anti-incision sleeve compatible, Color-coded identification, Non-conductive
