

5000W DC to AC Power Inverter

This 5000W power inverter converts DC power from a battery into standard AC power, allowing the operation of various electronic devices. It is designed with multiple AC outlets, USB ports, and safety features such as overload, over-temperature, and short circuit protection.

Overview

High-Performance Power Conversion

This 5000W DC to AC power inverter provides a reliable solution for converting battery power into standard AC electricity. Designed for versatility, it supports a wide range of electronic devices and is an essential tool for cars, trucks, RVs, and mobile power applications. With integrated safety features and real-time monitoring, it ensures stable and secure power delivery for your equipment.

Technical Specifications

Rated Power Output

5000 W

Maximum Output

Safety Protections

Overload Protection, Over-Temperature Protection, Short Circuit Protection

Features

Connectivity

- Multiple AC Outlets
- Integrated USB Charging Ports

Monitoring Capabilities

Digital Voltage Display • Wattage Monitoring
