

5000W Portable AC Generator

This 5000W portable AC generator is designed for home use and other applications requiring reliable power. It provides a stable AC output and is equipped with various outlets and controls for easy operation and monitoring.

ADDITIONAL IMAGES

Product Overview

The compact and mobile design features a silent enclosure, making it suitable for residential use and easy transportation.

Reliable Portable Power Solution

This 5000W portable generator is engineered for independent power supply, making it an ideal choice for home backup, outdoor activities, and remote job sites. Designed with a focus on stability and durability, it features a robust engine and a protective enclosure that significantly reduces operational noise. With its integrated wheels and handle, the unit offers excellent mobility for 'anytime, anywhere' power requirements.

Recommended Applications

Home Backup, Emergency Power, Outdoor Activities, Remote Job Sites, Residential Areas

Technical Specifications

Model Specifications (GG6200)

Feature	Specification
Model	GG6200
Generator Type	Open Frame
Phase	Single or 3 Phase
Rated AC Voltage	230V or 110/230V
Engine Type	4-stroke, Air-cooled, OHV
Starting System	Recoil / Electric

Design & Safety

Design Features

- Soundproof/Silent enclosure for noise reduction
- 100% Copper winding for high efficiency
- Overload protection system
- Low oil shutdown safety feature
- Integrated wheels and handle for portability
- User-friendly control panel with voltmeter

Build Quality

Silent Operation • Air Cooled • Portable Design

Operational Environment

Noise Level	96 dB(A) @ 7m
