

500A Heavy Duty Electrode Holder

This heavy-duty electrode holder is designed for arc welding applications. It is capable of handling up to 500A, ensuring efficient and reliable performance.

Overview

Industrial Grade Performance

This heavy-duty electrode holder is engineered for demanding arc welding applications, offering robust construction and reliable performance. Designed to handle up to 500A, it ensures efficient operation while maintaining operator safety through its insulated handle. It provides a secure grip for precise welding control and is compatible with a wide range of welding rods.

Features

Safety & Design

- Insulated handle for operator safety
- Ergonomic design for comfort
- Secure grip for precise welding control
- Heavy-duty construction
