

500kg Electric Winch

This electric winch provides a lifting capacity up to 500kg for various applications. It features a durable housing, a high-performance motor, and a user-friendly control system.

Product Overview

Professional DC Electric Winch

This 12V DC-powered electric winch is designed for versatile lifting and pulling applications. Featuring adjustable speed controls and a robust single-hook design, it offers reliable performance for various professional tasks. Built-in safety features, including protection against incorrect battery pole connections, ensure safe and efficient operation in demanding environments.

Technical Specifications

Lifting Capacity

227 Kg

Capacity

Power Requirements

- Voltage: 12V DC
- Input Power: 300W
- Battery Connection Safety: Included

Operational Details

- Method of use: Single hook
- Speed control: Adjustable
- No load speed: 0-1.0 Variable

Wire Rope Dimensions

5.6mm x 4.6m
