Product Overview

Professional Transmission Handling

This 500kg heavy-duty hydraulic transmission jack is engineered for the efficient removal, installation, and transport of transmissions, gearboxes, and other heavy automotive components. Designed with a wide base for maximum stability, it features a 360-degree swivel head and smooth-rolling castors for precise positioning under the vehicle. The foot-operated hydraulic pump allows for hands-free operation, ensuring safety and control during critical repair tasks.

Technical Specifications

Lifting Capacity

500 kg

Max Load

1120 lbs

Max Load

Height Range
