

500kW Diesel Generator Set

This diesel generator set delivers 500kW of power. It is designed for reliable performance in industrial settings, offering 50Hz/60Hz frequency and 230V/400V voltage options.

Overview

Industrial Power Solution

This 500kW diesel generator set is engineered for demanding industrial applications, providing a reliable power source for backup needs or event support. It features a robust engine architecture paired with a durable enclosure designed to withstand continuous operation. With an advanced control system, users can efficiently monitor and manage power output, ensuring dependable performance when it matters most.

Rated Power Output

500 kW

Rated Power

Application Suitability

Industrial Backup, Event Power, Continuous Operation

Key Features

Core Features

- Robust diesel engine for reliable performance
- Durable weather-resistant enclosure
- Advanced integrated control system
- Efficient power monitoring and management
