

500mW RGB Animation Laser Light

This animation laser light has a laser power of red 300mW, green 50mW, and blue 150mW. The laser operates with a wavelength of green 532nm, red 300nm, and blue 445nm.

Overview

Professional RGB Animation Laser

The 500mW RGB Full Color Animation Laser Light is a versatile lighting solution designed for high-impact entertainment and stage applications. Featuring a high-powered laser module, it produces vibrant red, green, and blue colors to create dynamic visual displays. With support for various animation effects and patterns, this system offers precise control over laser movement and output for seamless integration into professional lighting setups.

Technical Performance

Total Power

500 mW

Laser Power

Color Support

Red, Green, Blue, Full Color RGB

Functionality

Visual Effects

- Animation effects
- Pattern generation
- Dynamic visual displays
- Precise movement control

Application

Recommended Use

Stage Lighting • Entertainment Venues • Animation Displays • Professional Events

System Integration

System Compatibility

Designed for easy integration into existing lighting setups
