

500W Single Output Industrial Power Supply

This industrial power supply is designed for indoor use and has an efficiency of 85%. AC input is selectable by switch.

Overview

Industrial Power Solution

This 500W industrial-grade power supply is engineered for high efficiency and reliability in demanding environments. Featuring a robust metal enclosure with active cooling, it is suitable for aerospace, military, and home appliance applications. The unit includes advanced protection circuitry and automatic thermal management to ensure stable operation.

Electrical Specifications

Rated Power

500 W

Power Output

41.7 A

Max Current

Available Output Voltages

- 5V
- 12V
- 15V
- 24V

Input Voltage Range

90-130VAC / 170-265VAC (Switch Selectable)

Frequency

50/60Hz

Physical & Protection

Dimensions

238 x 120 x 65 mm

Cooling Mechanism

Built-in fan with automatic temperature-controlled operation

Safety Protections

Overload Protection, Overvoltage Protection, Short Circuit Protection

Compliance

Certifications

CE • RoHS
