Overview

Versatile 504 Wheel Tractor for Modern Agriculture

The 504 Wheel Tractor is a robust and versatile agricultural machine designed to handle a variety of farming tasks including plowing, tilling, and hauling. Engineered for durability, it features heavy-duty axles and high-quality bearings to ensure a long service life even in demanding field conditions. With its ergonomic operator station and advanced transmission, this tractor offers a balance of performance, reliability, and ease of maintenance for small to medium-sized farms.

Performance & Handling

Performance Highlights

504 K

Model Series

4 WD

Drive Type

Transmission & Control

Transmission System	8+8 Shuttle Shift
Shifting Mechanism	Shift synchronizer for lighter and convenient operation
Steering Type	Hydraulic power steering with double steering cylinders on front axle

Chassis & Mobility

Tire Configuration

- Flat tire (Standard)
- Paddy tire (Optional)
- High-traction agricultural tread

Axle Sealing	High sealing performance for water or deep mud field operation
--------------	--

Operator Station

Safety & Comfort	ROPS, Canopy, Optional Cabin, Ergonomic Controls
Braking	Air brake optional for road transport

Attachments

Implement Attachment	Three-point hitch system
----------------------	--------------------------

Specifications Table

Technical Summary

Feature	Specification
Transmission	8F+8R Shuttle
Steering	Dual Cylinder Hydraulic
Bearings	High-quality long-life
Operator Protection	ROPS & Canopy Standard
