

50hp Marine Diesel Engine

This 50hp marine diesel engine is suitable for various marine applications. It features robust construction and reliable performance in harsh maritime environments, with a compact design ideal for recreational and commercial vessels.

Overview

High-Performance Marine Diesel Engine

This 50hp marine diesel engine is engineered for reliability and efficiency in demanding maritime environments. Featuring a compact, robust design, it offers simplified installation and transportation while maintaining superior power output. Advanced sealing techniques and reinforced components ensure long-term durability and reduced operational costs.

Performance Metrics

Power Output

50 hp

Rated Power

Overhaul Interval

10000 hours

Engineering Features

Durability & Build

- High-frequency hardened shaft diameter
- Piston ring sealing technique
- Valve sealing technology
- Increased fatigue strength
- Wear-resistant components

Maintenance & Efficiency

- Enhanced water filtration system
- Improved fuel cleanliness
- Injector protection
- High-pressure pump protection
- Reduced consumption rate

Design

Design Advantages

Compact Design, Easy Installation, Easy Transportation
