

50L High-Pressure Oxygen Cylinder

This 50L oxygen cylinder is made from aluminum and designed for high-pressure use. It is certified to TPED standards and suitable for various oxygen-dependent processes.

Product Overview

Industrial & Medical Grade Oxygen Cylinder

This 50L high-pressure oxygen cylinder is engineered from high-quality seamless steel pipe, ensuring durability and safety for demanding environments. Designed with consistent height and a smooth, protective finish, it is built for repeated use in critical applications. It serves as a reliable solution for industries ranging from steel cutting and welding to medical and electronic processes.

Technical Specifications

Volume Capacity	50 L
Material	Seamless steel pipe

Applications

Industry Applications	Steel Cutting, Welding, Medical, Electronics
-----------------------	--

Features

Product Highlights

- Seamless steel construction
- High-pressure resilience
- Smooth, durable exterior finish
- Designed for repeated industrial use
