

50L Thermoelectric Cooler and Warmer Box

This 50L thermoelectric box efficiently cools and warms its contents. It can be powered by either a 12V DC or 240V AC power source.

Overview

Versatile 50L Portable Cooling & Heating Solution

This 50L thermoelectric cooler and warmer is designed for maximum versatility, featuring dual-voltage support for both 12V vehicle outlets and 240V mains power. Ideal for camping and long-haul travel, it provides reliable temperature control to keep food and beverages either chilled or warm. Built for durability, the unit includes a sturdy handle and wheels for effortless transport across various environments.
