Overview

Professional Grade Power Transfer

These heavy-duty 50mm² jumper cables are engineered for reliable performance in demanding automotive environments. Featuring high-conductivity copper-clad aluminum conductors and a flexible, cold-resistant insulation jacket, they ensure efficient power transfer even in sub-zero temperatures. Designed for safety and ease of use, the set includes color-coded clamps and a dedicated storage case for convenient organization.

Technical Specifications

Cable Gauge	50 mm ²
Voltage Compatibility	12V
Insulation Properties	Anti-frozen, Thermal change resistant, Oil resistant, Chemical resistant

Usability & Safety

Safety Features

- Color-coded clamps (Red/Black)
- Tangle-free design
- Insulated grips for safe handling
- Flexible jacket material

Compatible Vehicles

Cars • Vans • SUVs • Trucks

Package & Warranty

Warranty	1 Year Limited
Storage	Portable impact-resistant plastic case
