

50W LED Light Source

This is a 50W LED light source. It features a compact square form factor with integrated mounting holes.

Product Overview

High-Performance 50W LED Module

This high-power 50W LED light source is engineered for versatile lighting applications, ranging from industrial environments to commercial spaces. Its compact, square form factor is designed for seamless integration, featuring built-in mounting holes for straightforward installation. Built with durable materials, this module ensures reliable performance, longevity, and efficient, bright illumination for demanding professional settings.
