Product Overview

Reliable Lighting Component

The 515 Lampholder is a robust and reliable lighting component designed for secure and efficient lamp mounting. Constructed from durable, heat-resistant Bakelite material, this holder ensures longevity and safety in various lighting applications. Its ergonomic design allows for simple installation and maintenance, making it ideal for both residential and commercial lighting systems.

Material & Construction

Key Features

Heat-resistant • Robust construction • High-conductivity metal

Housing Material

Bakelite

Internal Components

Copper parts, Iron lamp coil

Application

Suitable Environments

- Residential lighting systems
- Commercial lighting systems
