

5.25-Inch 8-Ohm Speaker

This 5.25-inch speaker has a standard impedance of 8 ohms. Its frequency response ranges from 55 to 22000Hz.

Product Overview

Versatile Active Speaker System

The 5.25-Inch Active Speaker System is designed for professional and versatile audio applications. Featuring integrated wireless connectivity, it allows for seamless streaming from smartphones and other compatible devices. With onboard controls for volume, treble, and bass, users can easily tailor the sound output to their specific environment.

Technical Specifications

Speaker Output Impedance	6 ohm
Acoustic Pressure	95 dB
Frequency Range	20Hz - 20KHz

Power and Connectivity

Input Voltage	AC 220V / 50Hz
Available Inputs	Wireless, AUX Input, AC Power

Control Features

Adjustable Controls

- Master Volume
- AUX Volume
- Treble
- Bass
