

5.25-Inch EBX Single Board Computer

This 5.25-inch EBX single board computer supports Intel PGA989 I3/I5/I7 CPUs. It also supports up to 16GB of DDR3 SO-DIMM memory.

Overview

High-Performance EBX Embedded Solution

This 5.25-inch EBX single-board computer is engineered for demanding industrial and embedded applications. Featuring a robust PGA processor socket and flexible expansion options, it delivers reliable computing power in a compact form factor. The board includes integrated I/O capabilities and is built to withstand rigorous environments, making it an ideal choice for developers and system integrators.

Technical Specifications

Form Factor	5.25-inch EBX
Processor Socket	PGA (Pin Grid Array)

Connectivity & I/O

Expansion Slots

- PCIe
- Mini-PCIe

Integrated I/O	Ethernet, USB, VGA
----------------	--------------------

Compliance

Compliance

RoHS

Design Features

Key Features

- Integrated Heatsink
- Debug LEDs
- Reset Buttons
