

52cc Air-Cooled Gasoline Engine

This high-performance, air-cooled, two-stroke gasoline engine is designed for diverse applications. With a 52cc displacement, it delivers reliable power and features a recoil starter and carburetor for efficient fuel delivery.

Product Overview

High-Performance 52cc Engine

The TB52 is a robust, air-cooled, two-stroke gasoline engine engineered for reliability and consistent performance in demanding environments. With a 51.7cc displacement and 1.4kW power output, it is optimized for portable power equipment such as brush cutters and trimmers. Its lightweight construction and efficient diaphragm carburetor ensure ease of use and dependable operation for professional applications.

Technical Specifications

Max Power

1.4 kW

Power Output

6500 r/min

Rated RPM

Cylinder Diameter	44 mm
Discharging Capacity	51.7 cc
Fuel Tank Capacity	1.2 L
Carburetor Type	Diaphragm
Net Weight	4 kg

Applications

Common Applications	Brush Cutters, Trimmers, Handheld Power Tools
